Environment Policy

Policy Statement

Consistent with applicable statutory obligations, regulations, standards, permits, licenses, and the expectations of interested parties, TasRail is committed to:

- Protecting the environment and preventing environmental harm through implementation of the TasRail Environmental Management System (EMS),
- Responsible environmental stewardship across our operations, minimising the environmental impact of our activities, products, and services.
- Maintaining a comprehensive understanding of our environmental risks and seeking to integrate best practice environmental management across company operations to "manage risk well".
- Provision of adequate resources to support the effective delivery of the company EMS.

To achieve this, TasRail will:

- Clearly define and periodically review Environmental Objectives and targets to drive improved environmental performance and business maturity.
- Identify and manage environmental risks consistent with relevant compliance obligations and best practice environmental management.
- Control, maintain, and adequately resource the processes and systems required to fulfil our compliance obligations and implement, maintain, and continually improve our EMS.
- Monitor and report our environmental performance against key corporate initiatives for a Zero Harm environment.
- Promote environmental awareness and deliver organisational competency through adequate training, information, consultation, and supervision to meet the commitments of this policy.
- Proactively report and investigate environmental incidents and near misses to prevent recurrence and implement corrective actions to resolve nonconformities.

This policy is communicated to all employees and made available to interested parties via the TasRail Website.

Steven Dietrich, Chief Executive Officer
